 FINNISH CUSTOMS, Statistics, P.O. Box 512,  
 FI-00101 HELSINKI

**Completion instructions:**

Please enter the original, incorrect information on the first line. You should only enter the corrected information on the second line.

The correction form is meant for amending previously lodged statistical declarations, for example incorrect commodity codes, countries, statistical values etc. Normal returned goods are not to be included in the correction form. Minor value corrections, such as subsequent price changes or reductions need not be stated. Corrections to a trade transaction or mode of transport are to be entered under "Further information".

An individual correction form can only be used for amendments that concern a single declaration.
