TARIFF ANNEXES

SECTION I
AGRICULTURAL ANNEXES

ANNEX 1

AGRICULTURAL COMPONENTS (EA), ADDITIONAL DUTIES FOR SUGAR (AD S/Z) AND ADDITIONAL DUTIES FOR FLOUR (AD F/M)

Where reference is made to this Annex, the agricultural component (EA) as well as, where appropriate, the additional duty on sugar (AD S/Z) or the additional duty on flour (AD F/M), is to be determined on the basis of the content of:

- milkfat,
- milk protein,
- sucrose/invert sugar/isoglucose,
- starch/glucose on the product concerned.

A corresponding additional code for these goods can be obtained from Table 1, below.

When calculating the sucrose/invert sugar/isoglucose content for the determination of the correct agricultural component within the concerned subheadings in cases where no sucrose or glucose is declared and/or found to be present, the amount to be included in the calculation set out in footnote ⁽³⁾ to Table 1 shall be the amount of fructose expressed as sucrose.

The agricultural component (in euro per 100 kilograms net) to be applied to the goods is set out in column 2 of Table 2. The additional duty on sugar ('AD S/Z') (in euro per 100 kilograms net) given in column 3 of Table 2 shall not apply in full, unless the tariff schedule makes reference to Annex 1 by means of the symbol 'AD S/Z'; the additional duty on flour ('AD F/M') (in euro per 100 kilograms net), set out in column 4, shall not apply in full, unless the tariff schedule makes reference to Annex 1 by means of the symbol 'AD F/M'.

- ⁽¹⁾ *Milk proteins*
Caseins and/or caseinates forming part of goods shall not be regarded as milk proteins if the goods do not have any other constituent of lactic origin. Milkfat contained in the goods at less than 1 %, and lactose at less than 1 %, by weight, are not considered as other constituents of lactic origin. When customs formalities are completed, the person concerned must include in the appropriate declaration: 'only milk ingredient: casein/caseinate', if such is the case.
- ⁽²⁾ *Starch/glucose*
The content of the goods (as presented) in starch, its degradation products, i.e. all the polymers of glucose, and the glucose, determined as glucose and expressed as starch (on a dry matter basis, 100 % purity; factor for conversion of glucose to starch: 0,9). However, where a mixture of glucose and fructose is declared (in whatever form) and/or is found to be present in the goods, the amount of glucose to be included in the above calculation is that which is in excess of the fructose content of the goods.
- ⁽³⁾ *Sucrose/invert sugar/isoglucose*
The content of the goods (as presented), in sucrose, together with the sucrose which results from expressing as sucrose any mixture of glucose and fructose (the arithmetical sum of the amounts of these two sugars multiplied by 0,95), which is declared (in whatever form) and/or found to be present in the goods.
However, where the fructose content of the goods is less than the glucose content, the amount of glucose to be included in the above calculation shall be an amount equal, by weight, to that of fructose.

Note:

In all cases, where a hydrolysis product of lactose is declared, and/or galactose is found to be present among the sugars, then the amount of glucose equal to that of galactose is deducted from the total glucose content before any other calculations are carried out.
